June, 2020

Dear Parents,

Congratulations to your child for completing a full year of math learning! The purpose of this packet is to help students maintain the math skills acquired during the year and to avoid the “summer slump”. We encourage the students to complete the packet at any pace that is comfortable. While the completion of this packet is not required, it is strongly suggested. We suggest that your child space the problems in the packet out over the 12 weeks of summer for optimal review and reinforcement.

Please encourage your child to devise a personal schedule that is appropriate to sustain his or her learning and practice. It is our hope that students continue to embrace and enjoy the process of mathematics even in the summer months. After each section, please review your child’s answers and check for accuracy against the key found on The Junior School website. Doing so will determine areas that may need further purposeful practice.

Please have your child bring the packet to school on the first day of school.

Have a fun summer and see you in the fall!

Sincerely,

The Second Grade Teachers

5 is greater than 4

Greater Than

Standard Form

657 is the standard form of 657.

Less Than (<)

$$2 < 5$$

2 is less than 5

Expanded Form

$400 + 30 + 2$ is the expanded form of 432.

Repeated Addition

You can use repeated addition to find the number of turtles.

$$3 + 3 + 3 + 3 = 12$$

Groups of 3 are added 4 times.

Word Form

Three hundred twenty-eight is the word form of 328.

Bar Model

This is an example of a bar model.
Use bar models to help you add and subtract.

Repeated Subtraction

You can use repeated subtraction to find the number of groups.

$$6 - 2 - 2 - 2 = 0$$

Groups of 2 are subtracted 3 times.

Review #1

1) Seven hundred six is the _____ form of 706.

2) Answer with $>$ or $<$.
